

BEHZODBEK ABDUMUTALOV

SOFTWARE ENGINEER

SUMMARY

Full-stack developer who learns best by building. Curious by nature, quick to adapt, and constantly exploring new tools and technologies including AI. Enjoys turning ideas into real, working products, improving them step by step, and applying problem-solving skills through hands-on projects. Currently strengthening skills in data structures, algorithms, and system design to grow as a well-rounded software engineer.

SKILLS

Languages

- C (basic)
- Python(basic)
- JavaScript
- TypeScript

Tools & Frameworks

- Node.js & Express.js & Nest.js
- Git & GitHub
- ReactJS(basic)

Databases

- PostgreSQL
- MySQL
- MongoDB
- SQL basics

Soft skills

- Problem-solving mindset
- Strong willingness to learn
- Self-disciplined and consistent learner
- Analytical thinking
- Good time management

EDUCATION

Tashkent State University of Economics |
2024-Present
Management
Part-Time

EXPERIENCE

Learning Experience

- Learned programming fundamentals using C, including pointers, structures, recursion, and file handling
- Built a strong foundation in JavaScript and TypeScript, focusing on functions, arrays, objects, and type safety
- Studied object-oriented programming and basic SQL concepts
- Gained practical experience with Git and GitHub for version control
- Currently learning data structures and algorithms (DSA) and system design fundamentals to strengthen software engineering problem-solving skills through self-study and practice projects
